-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. Applicant's arguments filed 2/23/2004 with respect to claims 4-6 have been considered and the erroneous printing of the Wallenius PCT application date has been confirmed, the rejection based on Wallenius has been withdrawn, As such, the instant office action will not be made final at this time as the examiner did not double check the correct date of the previously relied on document, nor did the appropriate office; however, the arguments are moot in view of the new ground(s) of rejection.

2. Applicant is still required to provide the proper certified copy of the proper foreign document (DE 00 / 1659) as an incorrect document (DE 00 / 1649) and its IDS has been submitted with this application.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 4-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 4, on (ln.4) reference to "the subscriber" lacks positive antecedent basis as neither a called or calling subscriber was directly referred to previously, this further presents confusion in that it is not clear if the intent is to refer to a subscriber at the called or calling station.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by
Voit et al. (#5,751,707).

The claims read on Voit as follows: with reference to (col.12,ln.8-20; col.13,ln.44-
col.14,ln.46; col.15,ln.1-35; figures 2-4) Voit teaches as pertains to claim 4 a method for
administering supplementary services in a telecommunications system including steps of routing
call from calling subscriber station to an intelligent node (via ISCP and S2 in figure 2, the SSP
queries ISCP, ISCP recognizes called part call processing record (CPR) which is used to
implement supplementary services for the subscribers), an operating menu is generated by the
ISCP sending query to generate a wireless network signaling address with a display of operating
menu with supplementary features generated in response (col.15,ln.13-16). With respect to
claim 5, Voit teaches the menu is transmitted via wireless network signaling address message
and thus is considered a wireless application protocol page as far as such phrase is limited by the
claim language as presented. With respect to claim 6, the menu is transmitted during signaling of
the call to the called subscriber station.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
